UB TCIE's Professional Development

5 Reasons You Should Add To Your Toolbox

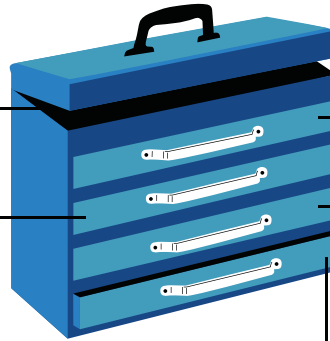

1 Perform your job better.

Enhanced knowledge equates to doing your job more effectively and efficiently.

2 Elevate your promotion potential.

You might catch your boss's eye – and make the case for a bump in pay – if you can demonstrate an ability to improve company performance. Consider, for example, that a typical Lean Six Sigma project* nets hard and soft savings ranging from \$10,000 to \$1.2 million.

* Outcomes vary by project area, breadth of scope and tools applied.

3 Update a stale resume.

If you're looking for a new job opportunity, you'll especially stand out with an industry recognized certification.

4 Be ready for the unknown.

Develop flexible skill sets so you're not totally shifted off-kilter if management throws you a curveball.

5 Fulfill your quest for personal development.

Embrace the notion of being a lifelong learner.

Average Number of Professionals Trained Per Year:

 = 1,250

Top 3 Course Offerings by Enrollment

- 1). Root Cause Analysis and Corrective Action
- 2). Certified Lean Professional
- 3). 3-Day ISO 9001:2008 Internal Auditor Training

What Our Students Are Saying

"Exceptional interactions between instructor and attendees with fabulous real-world examples!"

"It will, 100%, help me in my job. Having a trainer who has an excellent way of relaying the concepts and ideas was wonderful!"

"Very engaging. Best training I've been through! I'll start implementing tomorrow."

"Thought provoking. I will look to refine some of our processes."

"This really gave me the tools to provide huge returns to my company. The instructor could not have been any better."
